

# Pro 3D Printer

Ready for Today, Built for Tomorrow

## Capable

A breakthrough projector and resin tank combined with a larger build platform enable unprecedented throughput.

## Easy

Easily close intraoral scans without the need for third-party software. Auto-detect issues before you print.

## Advanced

Onboard help, over-the-air updates, and an advanced touchscreen computer that can print directly from a USB drive.

SprintRay Pro

# The New Industry Standard

3D printing in dentistry is much more than just a new technology: it has the potential to control costs, improve flexibility, and expand the scope of patient care. To deliver on this potential, we made SprintRay Pro the most user-friendly, powerful and reliable desktop printer in dentistry. Because the technology in your office needs to solve problems, not create headaches.

## Industrial Volume

Enough throughput to handle the largest jobs. SprintRay Pro features a larger build platform (18cm x 12 cm surface area) than its competitors while maintaining its desktop form factor.

## Up to 21 Arches

## Intensity, Meet Accuracy

The custom projector in SprintRay Pro delivers high-intensity light evenly across the build surface for perfect, accurate prints every time.

## 405nm LED 95 $\mu$ m Projector

## Unprecedented Speed

With industry-first advances in projector technology, SprintRay Pro is up to three times faster than its predecessor while offering improved accuracy.

## Up to 3x Faster

## Breakthrough Tech, Breakneck Speed

Cutting-edge advancements in tank materials unlock huge gains in speed, along with at least twice the tank lifetime for added reliability.

## Up to 50 Liters Lifetime

## Brains Behind the Brawn

Intuitive touchscreen controls and contextual instructions managed by a 6-core CPU make learning curves a thing of the past. Start print jobs directly from front panel USB port.

## Onboard Assistant

### Resin Agnostic

Choose the materials that are best for your applications. SprintRay Pro offers a wide variety of tested, verified resins from 3rd party vendors and we're always adding new options.

Dental Models

Surgical Guides

Dentures

Impression Trays

Night Guards

Removable Dies

Indirect Bonding Trays

### SprintRay Software

Automatically convert intraoral scans to full models, ready for printing. Add labels to model supports. SprintRay Software automates the frustrations away from dental 3D printing.

### Pro Cure

Pro Cure uses powerful LED arrays and convection heating to make post-processing a snap. Pre-programmed with settings for most popular resins.
