Application

Parameter & Advantages

| | | |
|---------------------|--------------------------------|--|
| Printing Size | 128mm x 80mm x 160mm | Mechanized production, saving labor |
| Resolution Accuracy | 100 um | Large forming area and high production efficiency |
| Layer Thickness | 20-100 um | Good controllability and high precision. |
| Printing Speed | 5-15s/layer | Self-developed consumables with high compatibility and low cost. |
| Equipment Size | 43cmx43cmx71cm | Strong technical support, mature after-sales service |
| Equipment Weight | 45 kg | UV LED light machine system with a life of up to 50,000 hours |
| Molding Technology | Digital Light Processing (DLP) | Light intensity calibration compensation technology |
| Printing software | Structure | Support for new UI design, better customer experience |
| File format | STL, SLC | Perfect appearance, portable and practical |
| System support | Windows | High surface smoothness |
